Why choose Stria™ Cladding?

Stria™ Cladding offers the perfect blend of durability and contemporary aesthetics. With its distinctive clean lines, and options for vertical and horizontal application, Stria™ Cladding creates a sophisticated, modern look that is engineered to stand up to harsh Australian conditions. The 14mm thick boards feature convenient interlocking edges for fast installation, and the pre-primed surface is ready for any exterior colour choice. Whether you're designing a modern home or updating an existing facade, Stria™ Cladding delivers enduring style backed by a 25-year warranty

Strong & Robust

A solid, 14mm thick stackable board. In particular, Stria™ Cladding Fine Texture has a subtle embedded render texture giving a heightened robust feel, perfect for ground floor applications.

Easy & Cost-effective

Simple installation. Concealed fix with no face fixing or patching required. Off stud joining option can help to reduce waste and the number of timber studs required.

Engineered to Endure

Durable and low maintenance. Hardie™ Fibre Cement is fire and rot resistant, and resistant to damage from moisture and termites. CodeMark Certified with a 25-year warranty.

Features & Benefits

Built for efficiency and lasting performance, Stria™ Cladding is pre-primed and ready for paint, offering fast and easy installation with concealed fixing options for a seamless finish. Designed for versatility, it can be installed horizontally or vertically and works with the Hardie™ Structural Batten for optimal ventilation and drainage. Durable and fire-resistant, Stria™ Cladding stands up to harsh conditions while delivering a sharp, modern look.

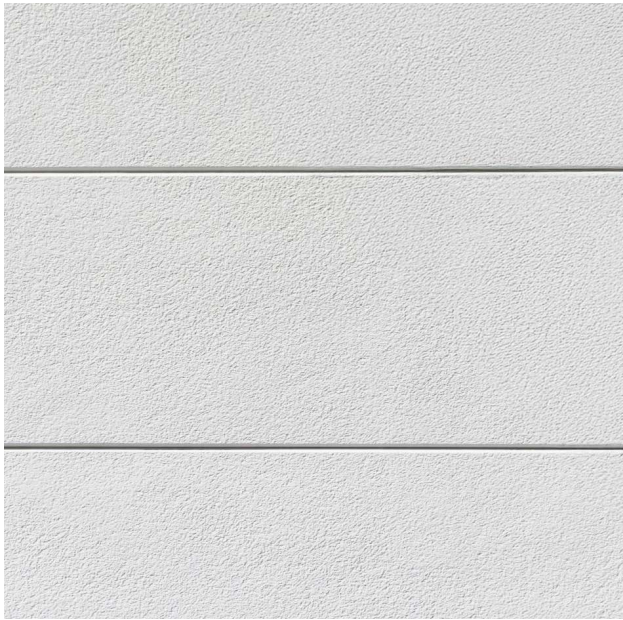

- Pre-primed and ready for paint
- Concealed fix option with minimal face fixing or patching for improved speed, cost and look
- Can be installed Horizontally or Vertically
- Used with the Hardie™ Structural Batten to optimise vertical installation, allowing ventilation and drainage through the cavity
- Gun-nail to timber frames or screw to light gauge steel frames
- Compatible with a range of 14mm accessories including our newest accessory Hardie™ 14mm Aluminium External Slimline Corner which gives a sleek external corner with a sharp, minimal edge.
- Made in Australia with Hardie™ fibre cement.
- Resistant to damage from termites, rot and moisture and can be used in bushfire zones and adheres to bushfire attack level BAL40. It has a fire rating of up to 60 minutes when used with Hardie™ Smart wall systems.

Stria™ Cladding Fine Texture

A highly versatile cladding solution, equally suited to facades, features and broad walls where tactility is desirable.

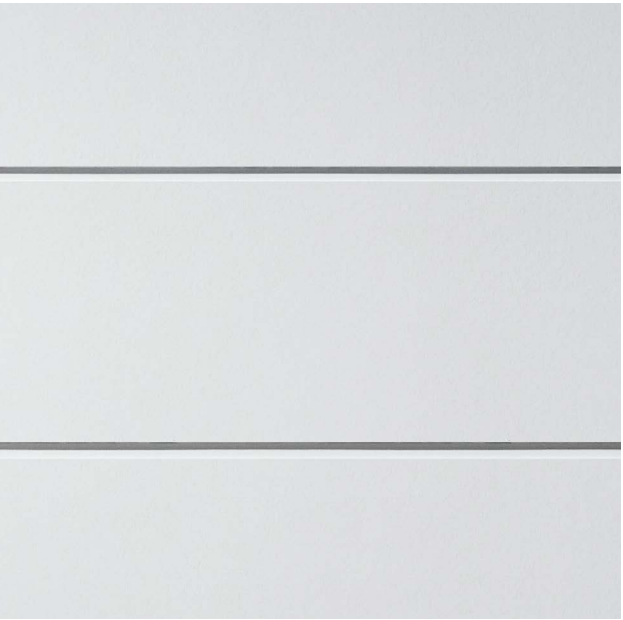

Featuring a sharp v-groove combined with an embedded fine render texture, Stria™ Cladding Fine Texture boards give a robust feel on the ground floor.

Stria™ Cladding Smooth

Clean and sleek, Stria™ Cladding Smooth is the perfect solution for contemporary designs that require a bold but pared-back aesthetic.

Featuring deep 15mm wide square-shaped grooves, Stria™ Cladding Smooth delivers strong lines for a clean and sleek aesthetic.

Product Specifications

Stria™ Cladding Fine Texture

A 14mm thick stackable board featuring a sharp v-groove combined with an embedded fine render texture for a robust feel on the ground floor.

325mm wide boards in 3000mm and 4200mm lengths helps to reduce waste in broad wall applications

Product specifications

Product Code	Description	Surface Texture	Length	Width	Thickness
405571	Stria™ Cladding Fine Texture	Fine Texture	3000mm	325mm	14mm
405570	Stria™ Cladding Fine Texture	Fine Texture	4200mm	325mm	14mm

Stria™ Cladding Smooth

A 14mm thick stackable board featuring a 15mm wide square-shaped groove and a smooth surface.

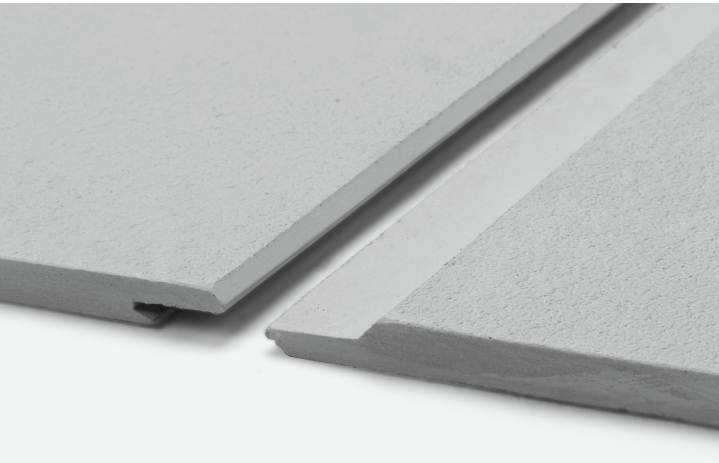

Available in two widths (325mm and 405mm wide boards) in 3000mm and 4200mm lengths. Introduce design versatility into your home by varying or alternating between widths.

Product specifications

Product Code	Description	Surface Texture	Length	Width	Thickness

404063	Stria™ Cladding Smooth 325mm	Smooth	4200mm	325mm	14mm
405505	Stria™ Cladding Smooth 405mm	Smooth	3000mm	405mm	14mm
404413	Stria™ Cladding Smooth 405mm	Smooth	4200mm	405mm	14mm

Fast & easy installation

Before you start installing, read the Installation Guide on the James Hardie website, or use the QR code shown here. It covers all the required components, tools and accessories, design guidance, safe working practices, and warranty information.

Stria™ Cladding Fine Texture
Shiplap joints make installation simple and fast.

Horizontal Installation

The cladding boards are fixed direct to frame with the shiplap joints making installation simple and fast. Both Stria™ Cladding Smooth and Stria™ Cladding Fine Texture give the distinctive lines of large format shiplap boards.

Vertical Installation

Vertically install Stria™ Cladding for a contemporary look. Vertical installation is enabled by the Hardie™ Structural Batten, which facilitates drainage and ventilation in the cavity wall.

For full Installation Guides, please see the Stria™ Cladding Smooth or Stria™ Cladding Fine Texture page

Design possibilities

Stria™ Cladding opens up a world of design flexibility for modern homes. Whether installed horizontally for classic clean lines or vertically for dramatic height, this versatile cladding adapts beautifully to your vision. Stria™ Cladding Fine Texture is great for Modern Classical, Box Modern and Modern Farmhouse styles, while Stria™ Cladding Smooth is often used for Modern Coastal and Barn style homes.

Stria™ Cladding also pairs perfectly with complementary profiles from the Hardie™ Architectural Collection to create beautiful contrasts in pattern and texture.

Vertical Application

The clean vertical lines of Stria™ Cladding Smooth give an artisanal look to this Barn style home.

Horizontal Application

Stria™ Cladding Smooth set against black framed windows and timber accents perfectly expresses the Modern Farmhouse style, bringing a sense of timeless craftsmanship and luxury to the exterior.

Complementary profiles

As seen in this Modern Classical home, a mix of Stria™ Cladding Fine Texture, and Hardie™ Fine Texture Cladding are used to define the structure of the building.
